Summary

Frontend Developer with 4+ years of experience in React, Node.js and headless CMS architectures, currently focused on Adobe Experience Manager (AEM). Strong background in building and maintaining scalable web platforms, with hands-on experience coordinating cross-functional teams (design, content, development). Previously worked in high-demand environments in the cultural and entertainment industry, bringing solid problem-solving and operational reliability.

Technical Skills

FrontEnd

React, JavaScript (ES6+), HTML5, CSS3

Experience building dynamic, scalable web applications using modern JavaScript and React. Proficient in developing reusable components, managing state with Context API, and implementing authentication flows. Strong background in creating responsive UI with semantic HTML5 and modern CSS, including utility-first frameworks like Tailwind CSS. Familiar with component libraries such as Hero UI. Experience integrating frontend architectures with routing strategies and SSR setups (Vite SSR) to optimize performance and SEO.

BackEnd

Node.js, Express

Backend development focused on building RESTful APIs using Node.js and Express, with or without TypeScript. Experience handling file uploads (Multer), interacting with the file system, and implementing authentication mechanisms using JWT. Skilled in structuring full-stack applications by integrating Express with templating engines like Handlebars, enabling efficient server-side rendering and seamless frontend-backend communication.

CMS / Platforms

Adobe Experience Manager (AEM), WordPress

Extensive experience across multiple CMS platforms, including AEM, WordPress, Drupal, Sitecore, and custom-built solutions. Currently working as a Content Lead in AEM, responsible for content lifecycle management, component configuration, and site structure optimization. Skilled in managing, Partial Templates, Experience Fragments, Content Fragments, forms, and global configurations, as well as supporting feature testing and onboarding new team members.

In WordPress, experienced with Elementor-based development, SEO optimization using Yoast, and eCommerce implementations with WooCommerce, including API integrations for extended functionality.

Tools & Practices

Git, REST APIs, Agile, Task Tracking

Strong experience using Git for version control in collaborative environments. Familiar with Agile methodologies and cross-functional teamwork, using tools such as Jira, Trello, ClickUp, Basecamp, and Notion for task and project management. Emphasis on writing maintainable, scalable code and following best practices across the development lifecycle.

Databases

MongoDB, Firebase

Experience working primarily with NoSQL databases, including MongoDB (self-hosted and Atlas) and Firebase (Firestore and SDK integration), designing efficient data models and handling real-time data interactions. Basic experience with relational databases such as MySQL, currently expanding knowledge in PostgreSQL.

Professional Experience

2025 to Present

Lead AEM Content Analyst

MRM / Critical Mass - IPG / Omnicom

- Led cross-functional coordination in a self-managed team environment, acting as operational backup by aligning PM (client) communication, managing team availability (OOO), and resolving delivery blockers across projects.
- Designed and implemented process improvements for content workflows in **AEM**, including a standardized workflow for shopping links implementation, reducing turnaround time.
- Built automation systems using **PowerTools** from Microsoft to track support overtime and notify teams proactively, improving time-off utilization across LATAM teams (Colombia & Argentina).
- Initiated and structured a **training committee** on BOG, accelerating onboarding and continuous learning for new hires while promoting adoption of new tools and best practices.
- Developed internal tools (Excel-Macros-based systems) for campaign planning (e.g., L'Oréal email calendars), improving visibility and coordination between marketing and content teams.
- Implemented lightweight HR automation (birthday tracking + benefits allocation), improving internal engagement and administrative efficiency.

2024 - 2025 AEM Content Analyst Jr

MRM - IPG

- Delivered high-volume AEM authoring for GM brands (GMC, Chevrolet, Cadillac, Buick), including handling urgent (HOT) client requests with consistent on-time delivery.
- Built and optimized collaboration workflows with QA and PM teams, improving delivery efficiency and reducing iteration cycles.
- Developed an Excel macro-based ticket tracking system for local teams, increasing visibility and prioritization of incoming requests.
- Identified and resolved a critical UI issue caused by component misuse in AEM, proposing a new implementation approach that improved UX across GMC and Chevrolet platforms.
- Supported international project launches (e.g., Chevrolet Europe) by coordinating release timings and ensuring production readiness.
- Introduced productivity tools (Microsoft PowerToys) into team workflows, training team members and improving operational efficiency.
- Contributed to onboarding by delivering AEM component training sessions for new hires, reducing ramp-up time.

2020 - 2024 WebSite Content Editor

E+V - GamerFocus

- Designed and implemented a centralized Google Drive-based project management structure (assets, copy, schedules), significantly improving team accessibility and operational efficiency.
- Managed end-to-end execution of multiple large-scale eSports and gaming events, including planning, web presence, tournament logistics, and user support for public and private sector clients.
- Coordinated cross-functional teams (design, development, content) to deliver event websites, including wireframing and UX planning for new platforms.
- Developed tournament management systems (match brackets, scheduling, support tracking), improving operational control and participant experience.
- Optimized SEO performance for the digital publication GamerFocus using Yoast SEO, increasing search visibility and content indexing.

2023 - 2024 Social Media Content Management

E+V - GamerFocus

- Designed a scalable content planning system for social media, improving publishing consistency and team coordination.
- Collaborated with design and copy teams to produce content that increased organic reach and engagement across platforms.

2022 - 2022 Logistic Support XIX “Juegos Bolivarianos de Valledupar” 2022.

E+V - GamerFocus

- Supported the execution of the esports segment of a major international sporting event, implementing online competition formats that increased player participation and audience engagement during pandemic conditions.
- Contributed to web-based tournament operations, ensuring smooth coordination between digital platforms and event logistics.

2018 - 2019 Stand Customer Service – SOFA

TribuGamer

- Delivered on-site technical and customer support for large-scale gaming events, assisting professional players and managing match flow and equipment setup.
- Coordinated booth operations, including participant tracking, match organization, and setup/teardown logistics.

Projects

A selection of my frontend, full-stack, and CMS-based projects including React applications and Node.js APIs is available in my online portfolio. These projects showcase my approach to scalable architecture, UI development, and performance optimization.
